

(9)

"The coloured states are numbered starting at zero" makes no sense because the edges have colour names, and these represent transitions.

$$(b) \quad \overline{A+B} = \overline{A} \cdot \overline{B}$$

$$A = A(B + \overline{B})$$

I'll edit/annotate in this box electronically

$$\oint V dv = 0$$

kind of makes it
a bit simple.

because I forgot something, oops.

(c)  $\oint_V \psi_v dv = \int_0^h \int_0^d \int_0^w \psi(x,y,z) dx dy dz$

$\psi(x,y,z) = x + 2y - z^2$

The diagram illustrates the marking process flow:

- Mark** (Red box) leads to a **section** (Red box) containing a **Q** (Question) and a **number** (Red box).
- The **section** leads to a **mark awarded** (Red box) containing two **number** (Red box) fields.
- The **mark awarded** leads to a **Mark** (Red box) containing a **✓** (Checkmark) and a **number** (Red box).
- The **Mark** leads to a **Sub-total** (Red box) containing a **number** (Red box).
