

B1

(9)

"The coloured states are numbered starting at zero" makes no sense because the edges have colour names, and these represent transitions.

(b) $\overline{A+B} = \overline{A} \cdot \overline{B}$
 $A = A(B+\overline{B})$

I'll edit/annotate in this box electronically

$$\oint V dv = 0$$

kind of makes it a bit simple.

because I forgot something, oops.

(c)

$$\oint_V \psi_v dv = \int_0^h \int_0^l \int_0^w \psi(x,y,z) dx dy dz$$

$$\psi(x,y,z) = x + 2y - z^2$$
