B1

(a)

$V = \dfrac{W}{2}$

more annotation in here

"The coloured states are numbered starting at zero " makes no sense because the edges have colour names, and these represent transitions.

(b)

$\overline{A + B} = \overline{A} \cdot \overline{B}$
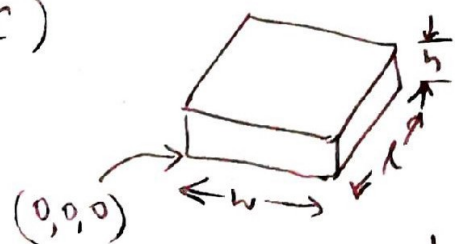

$A = A(B + \overline{B})$

I'll edit/annotate in this box electronically

$\oint V \, dv = 0$

kind of makes it a bit simple.

because I forgot something. oops.

(c)

$(0,0,0)$

$\oint_r \psi_r \, dv = \int_0^h \int_0^d \int_0^w \psi(x,y,z) \, dx \, dy \, dz$

$\psi(x,y,z) = x + 2y - z^2$
